

RESOLUTION TO THE NSC
FROM SOC

We are critical of the NSC for sending out documents on the Southern California Local Center experience which failed to represent the full range of views on the question. We are also critical of the unorganized and haphazard way that they were sent out. Furthermore, we feel that the NSC should inform and consult with authors of documents before these documents are distributed nationally.

Socialist Organizing Comm., 8/30/79
(passed unanimously)

AMENDMENT TO THE PROPOSAL TO THE NSC FROM THE SOC

The SCALC has been held up as the advanced experience for the CCIC as a whole to learn from. This experience should have been more adequately investigated and summed up in an all-sided way. All the range of opinions and perspectives from Southern California have not been distributed prior to the conference. This lack of investigation and full summation is a poor method of preparation for ideological struggle. We would ask that a representative from the NSC come out as soon as possible to join with us in investigating fully this experience for the purpose of presenting all the range of ideas to the CCIC as a whole on this question.

Amendment passed 50% yes, 16% no, 16% abstained, and
