To Branch Organizers

Dear Comrades,

Attached for your information is a copy of a leaflet recently distributed by the National Caucus of Labor Committees. We continue to get reports of phone calls and similar harassment. Comrades should let the national office know about further incidents.

Comradely,

Doug Jenness

FBI RUNS CANDIDATE FOR PRESIDENT

The Socialist Workers Party (SWaMP) is running Peter Camejo for president in 1976. He is the FBI's candidate for president. The Pike and Church Committees and former National Security Council (NSC) operative Roy Frankhouser have provided conclusive proof that the NSC planned and coordinated the November, 1963 assassination of President John F. Kennedy using known agents of the FBI and CIA within the Socialist Workers Party (SWP) and other groups. Lee Harvey Oswald was a CIA agent who, along with CIA agents John and Ruth Paine, joined the SWP and obtained the New Orleans franchise for the SWP's front group, the Fair Play for Cuba Committee. The SWP pushes the explicitly fascist "community control" belief structure, one of the proven main ideological weapons of the CIA/FBI against U.S. working class and ghetto populations--much like its predecessor the National Socialist Workers Party (the official name of the NAZI's).

The very first leaflet attacking the National Caucus of Labor Committees, the parent organization of the U.S. Labor Party, published by SDS in 1963, was in fact written by the FBI, according to the Senate Select Committee on Intelligence and squarely counterposed "community control" to our international perspective. Ernest Mandel, erstwhile head of the so-called "Fourth International" of which the SWP is a nominal member, was an agent of Anglo-American intelligence since World War II and the first and foremost promoter of "community control" operating on an international scale in the post WWII period. The SWP is a thoroughly controlled agent formation directed by NATO intelligence from the top down.

However, one does not need to see pay stubs to prove agency. The key to uncovering political agency is the political content and organization and/or individual expresses; community control is a paranoid CIA sponsored concoction designed to render a population psychotic enough to accept unemployment, general chaos, ecological holocaust and even nuclear war "to protect OUR turf," however narrowly one defines "us" (race, sex, religion, nationality, etc.). This is an overt attempt to prevent workers understanding and organizing for the Labor Party's program for International development and cooperation for fusion power. Nelson Rockefeller has recently deployed his entire entourage--the Communist Party USA, SWP, Maoist and Trotskyist sects, Ku Klux Klan, Ustashi, National Revolutionary Army, the Manson cult, "Jesus Freaks," etc.--often at the same site handing out the same leaflet with the same message: Get the Labor Party. What unites these seemingly diverse groups is their hatred of human development which exceeds their own stunted and warped self-conception.

In his insane drive for nuclear war to collect on his worthless paper and to prevent the Labor Party from catalyzing an intellectual renaissance among American workers to expand industrial and agricultural production, Rockefeller and his agents will stop at nothing. Neither should you. If you see these zombie scum on the street peddling their rag, the Militant, let them know what happened to fascists in WWII. Call them and let them know that you will not allow a grey flannel pervert FBI agent to run for president. Dogs may relieve themselves wherever they feel like, but fascist dogs have no political rights!!

DUMP ROCKY/KISSINGER/LEVI -- CALL THEIR STREETWALKERS IN THE SWP.
FINISH WORLD WAR II!!
