To United Secretariat  
from KAF:s political bureau

Regarding annual report,

We stress, in our contribution about the world political resolution and in our alternative to chapter V in that resolution, the need of an annual report from the USec and IEC.

Such a report would be very valuable to make it possible to judge with which forces we can undertake to carry out the tasks we pose. Furthermore we think that it's very abnormal that in the pre congress discussion it is a faction, the bolshevik faction, that have attempted to make a balance sheet for the Fourth International.

We think that we need such a report from the USec before the world congress even if the time is short.

If such a report should be useful must it be based upon reports from the different sections about their work and especially their attempt to change the social composition - i. e. their proletarianization - and other problems in partybuilding.

Therefore we urge that the USec should demand reports from all sections about their work, proletarianization and problems in partybuilding.

We gladly recieved the news that, in connection with the world congress, there will be a special meeting organized about work in youth organizations. This is a good initiative. But we also see the need of a special discussion about the proletarianization of the sections of the Fourth International.

Therefore we propose that the USec prepare the possibilities to arrange discussions, in workshops, about the experiences of proletarianization that different sections have made, parallel to the world congress.

COMRADELY GREETINGS  
KAF:s POLITICAL BUREAU.
