TO ALL ORGANIZERS AND ANTIWAR DIRECTORS

Dear Comrades,

As part of the preparations for the National Student Antiwar Conference, the Student Mobilization Committee will hold a national working committee meeting in Washington D.C. on Saturday, February 5. This will be an extremely important meeting for a number of reasons. It will serve as a planning meeting for both the working sessions of the conference and the Friday night session, which will be a national teach-in on the war. The meeting will also be an opportunity to discuss the most recent developments in the antiwar movement with the key SMC activists as well as hear progress reports on building the National Student Antiwar Conference around the country. Finally, it will help prepare the SMC nationally for the last three weeks of conference building.

It is extremely important that at least one person from every regional center and preferably two or more, attend this meeting. While the SMC is not projecting this as a particularly large meeting it is important that it be as geographically representative as possible.

The meeting is being held on the same weekend as the next NPAC national steering committee meeting, also in Washington. Hopefully this will ease the burden on areas which must spend a great deal of money to send someone to Washington. Because these meetings are so important every area, including areas on the West Coast, should try and send someone. In areas where only one person can be sent that person should be an SMC representative who can attend both meetings.

Regional SMCs should inform the SMC national office as soon as they know who will be attending the meeting and also whether they will need housing for Friday night as well as Saturday.

Organizers and antiwar directors in regional centers should give this their immediate attention.

Comradely,

*Geoff Mirelowitz*

Geoff Mirelowitz  
YSA Antiwar Director

*Wendy Reissner* (KR)

Wendy Reissner  
SWP Antiwar Director
