Ohio Senator Gets "Honest Graft" From Nation's Coffers

New York, July 11.-United States enator Charles Dick of Ohio, member of the senate committee on postoffices and postreads and author of the noto rious Dick military law, has been discovered in a little private business deal that proves his hustling qualities, and at the same time is said to be a triff contrary to law.

The discovery came through the nals simplicity of a co-partner of Dick in the Universal Pneumatic Transmission company of New York, William Dinspel. Mr. Dinspel is the inventor of the tube for the transmission of large parcels and ultimately human passengers which has been installed to several cit-ies for postoffice work.

"The morgue is dead!" is the flash that has been given to every telegraph operator in the United States.

What "The Morgue" Is "The Morgue." known to telegraphers throughout the land, is the restaurant formerly owned by "General" Arthur Owen Simpson, on the eleventh floor of the Western Union building. And in answer to "The Morgue is dead!" the telegraphers wire back, "Let it rest in peace," for very few of the telegraphers had any distinct lik-ing for "The Morgue."

Run at Great Profit

Mr. Simpson had been running the place at an enormous profit at the ex-pense of the telegraphers. Operators coming into the Chicago office and not having any ready money were put to work, and were then obliged to cat work, and were then of their meals at this place.

"Of course Simpson had a cinch or their pay, and he naturally didn't care much how he threw the coffee and sinkers out to the men," said one of the telegraphers. "One of his favorite schemes for making money was to let the men sign up for a dollar and then charge them 20 cents interest for two weeks' use. Meals usually ost from 50 to 60 cents."

New Company in Control

Mr. Simpson leased the place from month to month. When the American District Telephone and Telegraph com-pany took a controlling interest in the Western Union they started to improve things a little. One of the first things ccomplished was the throwing out of The Morgue."

Plans are now being made for the in-stallation of a restaurant, which it is said will be first class in every respect. A resting room is also to be put in for the women employes. There are about 2,000 telegraphers at this building, several hundred of them being wom-

This blank isn't worth as much as a big zero with the rim torn off, if you don't use it. Right now we've got to get a bunch of NEW subscriptions It's up to you. If you can't get them, no one else can.

Your attention is called to the fact that the blank which goes to our out-of-town readers does NOT bear the UNION LABEL. Excites your curiosity, does it? Don't like it, you say? Well then GET MAD! The madder you get the better we will like it.

Oh, sure, it was printed in a union shop. But we had, to tell the printer to keep the label OFF! Why? Ask that gang down at Washington. They make the law. To conform to the postal law it is necessary to keep the label OFF. It is to laugh or to swear-or better yet-get subs.

By the way the blank is supposed to be used for ONE subscription only. Some of our friends pay their compliments to the plutes by filling up the whole page with names and then turning it over, and using the other side.

That is just what we want you to do. Get subs. Get them NOW! There may come a time when you can't. Elbert Hubbard, in his July Philistine, which he himself calls "The Rotten Number" (why no one knows, as they

are all rotten), makes this statement regarding Socialists: "A Socialist is a man who, as far as he himself is concerned, considers a thing done when he has suggested it." What he bases this statement on we do not know. Of

course, the stuff he writes is never taken very seriously, but this is the limit. If Socialists know anything at all they know that they must work, and work hard to realize their And they do work hard. They work, they undergo hardships, they sacrifice many things in order to help the cause. And along comes this capitalist apologist, making a statement that entitles him to a front seat in the Ananias club! Wouldn't that jar you?

We Want Votes for Women

Socialism is based on democracy. There can be no democracy where one-half the population is barred from the voting booth.

Socialism is a movement of the workers. When woman came into industry she entered into the foundation of the social structure. She left the old social order of rulership behind her along with the hand loom, the spinning wheel and the potter's bench.

Not until the suffrage movement was based upon a class of industrial workers was it anything more than a pious wish. This was true of manhood suffrage. It is equally true of woman suffrage. While woman's work was confined to the home, the demand for votes for women was but a voice crying in the night.

When woman entered the mill and the factory millions strong it was inevitable that she should enter into the government based upon factory manufacturer. While she spun and wove for the family alone, the family was the social and political unit and it was inevitable that the strongest member of that family should represent it alone in the wider relations which that family had with other families in the state.

When woman spun and wove for the world market it was equally inevitable that she should become a part of the political society dependent upon that world market. She was working for all. She was working with all. She is going to share in a government for all and with all.

Those who are seeking the suffrage for woman apart from the working class movement are trying to use the worn out methods of the days of the domestic system of manufacture. Their efforts are not in vain, but they are apt to be ineffective and wasteful of energy.

Th Socialist who is blind to this phase of the social revolution is standing in the road of his own progress. The Socialist wants votes for women, not as pretty playthings, but as instruments for the emancipation of the workers.. He is not seeking abstract justice. He knows such a thing exists only in dead metaphysical treatises, and is only invoked to deceive and betray. But the ballot is a weapon of class rule. It was of little value to the workingmen until industrial evolution had taught class consciousness. It would be a curse to woman and to the workers if it came as a result of a sex

The Socialist party must throw itself into this fight with vigor. The fight to open the road to the ballot box for one half the race is a working class fight. It is worthy of all the best energies of the Socialist movement. It is a fight that is on NOW.

Contemptible Injunctions

The injunction only lives because it scares someone. When its bug-a-boo character is exposed it is a joke.

The way to treat an injunction is with contempt. It has no place in our institutions. It is an insolent piece of nerve on the part of the capitalist courts, and would not exist a year if treated with the contempt it deserves.

If every injunction issued in a labor dispute, seeking to make crimes of things that are not crimes at any other time, were systematically and flauntingly violated the injunction abuse would dis- for a revision of the tariff. A "re- A leading banker says it isn' appear in a year.

When Judge Windes issued his injunction in the chauffeurs' case the Daily Socialist promptly violated it and dared the judge to back story of the little boy who prayed Well, we never thought that up his bluff. Up to the present time no one has been arrested and many weeks for a baby brother, shearing was as much fun for the the injunction has been completely disregarded.

If they did there would be such an upheaval in judicial procedure that most of the judges would be hunting new jobs.

It is not in order for anyone to say that we are advising lawlessness. INJUNCTIONS ARE JUDICIAL UKASES, NOT LAWS. By obeying them we consent to a destruction of the fundamental principles of Republican government, and become a party to the conspiracy against such a measure of liberty as the present government insures.

Self Criticism in Milwaukee

On this page is printed one of the most remarkable documents produced. Maybe there wouldn't in the literature of American Socialism. This is the article of Victor L. Berger discussing a situation that has arisen in the Socialist administration of that city.

This article is not important because of its arguments. It is really not of fundamental importance whether Berger is right or wrong in his controversy. To be sure we think he is right, tremendously right.

But that the first sharp criticism of that Socialist administration should come from within the ranks of those who apparently had most to lose by such criticism is a significant fact. To be sure there have been a few criticisms from within the Socialist party before, but they came from those whose idea of a revolution is boldly breaking some social conventionalities in a real naughty "Bohemia," and agnostics?" who were disappointed because the Milwaukee Socialists had not seen fit to indulge in that sort of revolution.

Berger's criticism is different. He is criticising what he loves and knows and what is in part his own handiwork. He is criticising, as Socialists have always criticised their own movement, because they want it to be better, because it is THEIR movement.

There is nothing gentle or apologetic in that criticism. It is definite, specific, stern and uncompromising.

of Milwaukee.

It is one of the best things that has been done by the Socialists

The Election Is Over

So far as the Republican and Democratic parties are concerned in Chicago the election is over. Busse and Sullivan have agreed nourishment, thus creating a greater A fir was tied down on its back, and upon the tickets to be nominated. Meanwhile the "insurgent" Republicans, the "radical" Democrats, and the reformers in general will help make a noise and fur- cork, was fed regularly from a needle nish the votes for both parties, innocently thinking that they are dipped in honey, and the needle having something to do with running the election.

Meanwhile the Socialist party will be sawing wood, and when the ballots are counted there will be some big surprises for the

Rather Lose Votes Than Lose Party's Proletarian Character

BY VICTOR L. BERGER (In Social Democratic Herald.)

A party like ours, which aims at a total change of the present system, ought to pause from time to time in order to review its own activity. This is especially necessary when that party seems to be successful as we are in Milwankee. And even more so when we find that the enemy

Therefore, let us ask ourselves, "Are we making good as a Socialist party? Or is our organization only a cheap new broom for the cleaning of the streets and alleys of City of Milwaukee-incidentally also sweeping out a few grafters from the city hall?"

There can be no doubt that our mayor, Emil Seidel, has started out nicely. He has made some very good appointments and he is himself "on the job" all day.

The department of the city attorney, Comrade Hoan's department, is also doing all that can be expected. As for the other department heads, they have been in office only a few weeks. . . .

We have been in power now for almost three months. Now, what have we done for the working class as such? What measures have we passed and carried out that are of interest to the city collectively? Let's see.

We have abolished the three-headed board of public works and have put in a one-man commissioner.

A good measure if our man makes good, of which we feel sure—but not a Socialist measure in itself. We have pasesd an ordinance establishing the COST

UNIT system. Also a very good thing and of great interest to the city collectively. But as yet we could not secure the right man to take the job, so this can hardly be called an accomplishment now. We have introduced a number of ordinances to compel

the street car company to give efficient and decent service. But so far there has been very little accomplished in that

The street car service is as irregular and insufficient as ever. The indecent over-crowding of cars is still going on. The police would not stand for over-crowding of that kind in any public hall, theater, or church. Yet one can often see a street car stuffed with people almost to suffocating and then see a big, stout policemen instead of stopping the nuisance—only add to it by trying to squeeze in his own burly form.

It is much too early to pride ourselves of our success in Milwaukee. Only one thing is certain.

The most dangerous part of the situation is that some of our comrades seem to forget that we are a SOCIALIST

They not only begin to imitate the ways and the methods of the old parties, but even their reasoning and their thoughts are getting to be more bourgeois and less proletarian. To some of these men the holding of the office-whatever the office may be-seems to be the final aim of the Socialist party. These poor sticks do not know that there are many Socialists who deplore that the necessity of electing and appointing officeholders will make it twice as hard to keep the Socialist party pure in this country, than in other countries, where the movement is relieved of this duty and danger.

And even some of the aldermen seem to have lost their Socialist class consciousness-if they ever had any. Instead of that they seem to make it a point "to be agreeable" to the old party politicians. Their kindness extends even to the MEMORY of the old capitalist and grafter's

A machinists' union from New York sent a very sympathetic letter to the mayor and the common council of Milwaukec, offering help in the disposing of the city bonds and incidentally referriong to previous "boodle and graft administrations."

.To which allusion an illustrious remnant of the Bose regime, one Joseph P. Carney, took exception. Now, Carney is an enemy of his class and a traitor to union principles. Therefore, he did not want the previous administrations referred to as "graft administrations." Four grand juries had brought about 230 indictments against them. Quite a number of the officeholders of the former administrations had been found guilty and fined, or sent "over the road." But Carney objected to a spade being called a spade.

In his objections he was ably seconded by Alderman Bogk, also formerly a part and parcel of the Rose clique. These gentlemen insisted that the letter of the Manhattan Machinists' union, a friendly and sympathetic com-

munication, should be orpunged from the minutes of the common council because of that reference to the former administrations.

Our own capitalist papers of Milwaukee have said worse things hundreds of times. The minutes of the common council must certainly contain a record of one Frank Niezorawski, commissioner of the board of public works; one Mike Bunn, building inspector, and a number of others having been taken off their jobs because they had very pressing engagements with the criminal authorities-yet with one exception (Fred Braun), the representatives of the capitalist parties voted in favor of expunging that letter of the machinists' union from the minutes.

They did not succeed, of course.

But no less than three Social-Democratic aldermen. Louis A. Arnold of the Seventeenth ward; Martin Mikkelson of the Fifth ward, and John Reisse of the Sixth ward, voted with them. Evidently these comrades would rather hurt the feelings of all the members of the machinists' union in New York, and the social conscience of every loyal comrade in Milwaukee, than hurt the feeling of any local grafter. . . .

If that is not "senatorial courtesy," then what kind of courtesy is it?

The Social-Democratic party of Milwaukee is going to make good in the city affairs of Milwaukee as no party ever did before. But it can only make good if it keeps intact its class consciousness and its social conscience.

Personally, we would rather lose half a dozen municipal elections, including every alderman in the common council. than lose the solidarity and the proletarian character of the party. We would rather have ten thousand votes less for our ticket at the next election, than miss one spark of the Socialist SPIRIT of our organization.

All who are concerned will please take notice.

This much to be desired and matchless organization can be had, just as soon as we teach the workers the necessity of, and the means of obtaining it. This brings us up to the main point; that of necessity, be specialists in their line, requiring the Socialist publications to inaugurate a department teaching the methods and principles of organization, requirements and means of building

such an organization. This teaching should be systematic, so that the results may be the same in all parts of the country, and for this reason should be under the jurisdiction of the

national party organization. This department, teaching the needs and methods of organization, would not only solidify the workers but would at the same time build up a powerful press fore the reader in a catchy, readable with which to help secure the desired

results. This department we may have WHENEVER DEMANDED BY THE SUBSCRIPTION ARMY, and the party we will not be called on to witness the generally. It is up to you, comrades, to

fly.

When considering that it is an acrophate for a man to balance another on extended arms and legs, that is to say, balance his own weight for a length of time, we must admire the length of time, we must admire the feat of the fly, that, without apparent fatigue, balanced the ball and fly for fatigue, balanced the ball and fly for several hours.—Technical World.

WIRELESS TELEPHONE IN MINES

One of the places where the wireless telephone will be particularly valuable will be in mines. Now, any one who wants telephone connection with the underground workings of a mine has only to string a wire down the shaft.
