Because Chicago is facing a water famine in many sections of the city and has been subject to a scarcity of water in outlying districts for several years, the city council last night instructed its committee on water to investigate the present supply and prepare plans for its improvement along lines which will provide for the growth of the city.

Install More Pumps

In connection with this movement the South Park commissioners were empowered to install two electric pumps, with a capacity of 2,500,000 gallons every twenty-four hours, to pump water from the water tunnel at Sixty-eighth street. This will relieve the city of furnishing water to the South Park system.

Alderman Fisher of the Thirty-fourth ward asserted that there are minety-four miles of paved streets in his ward and that repairs on streets are needed in excess of \$34,000. He asked that the present plant of giving to each ward 85 per cent of the vehicle tax originating in it causes abuses, as the smaller wards with more resident teams get more money and yet have fawer miles of streets to repair.

"The rule of former President Hawley, who had intrenched himself through a clique, was completely broken," Cassidy added. "The editor of the mouthly official journal will not hereafter be under the supervision of the president. Other objectionable practices within the union were also eliminated."

UNION BRICKMAKERS OFFER ARBITRATION TO BOSSES

The union brickmakers who have been

The union brickmakers who have been on strike for several weeks against sixteen manufacturers of brick in Cook county will meet today with the employers and offer arbitration of the wage scale demanded.

If the working conditions caunot be agreed to, these, too, will be offered for arbitration. These proposals will be presented by the union representatives this afternoon.

They have been discussed before and the manufacturers seemed unwilling to agree to arbitration. The first formal offer of arbitration was made today.

The union men want a scale ranging from 2½ cents to 2 cents an hour over the scale of 1907.

Foreigners Not Meek

The big firm was formerly loosted at Lynn, but in order to get away from the horrid unions and to take advantage of what they thought would prove mack and humble ignorant labor, the firm moved to Chelsea. In the last expectation the firm, however, found itself writevants, mistaken.

self grievously mistaken.

Among the foreigners employed, after the firm moved, were Jewish workers for their lasting rooms. When the conern tried to force the screws down, the Jewish workers rebelled. Immediately the firm set up a howl of race prejudice through the capitalist press. As a re-suit, gentile workers applied, for posi-tions.

A woman who was stopped by one of the pickets was asked if she did not know that she was scabbing in taking the work of the strikers. Her reply, one of indignation, was:

Hark Back 2,000 Years

"Mr. Walton is a good Christian gen-tleman, and why shouldn't we help him in keeping Christians for the jobs and chase the Jews. Why, don't you know that it was the Jews that crucified Jesus Christ?"

Because of the unscrupulous factice that the employers have resorted to, public opinion favors the union men. The bosses' campaign of misrepresentation has been followed by efforts to coax the men back to work. Prospective strike breakers were recruited from Detroit and Grand Rapids. These men inquired regarding labor conditions here, and were misinformed. Arriving here most of them learned of the trouble and refused to work.

Journeymen who have been locked

ble and refused to work.

Journeymen who have been locked out are working for themselves and with occasional financial aid are in a position to stay out a long time.

The attack on the unions has had a beneficial effect. Minor dissensions have been forgotten and organized is bor glories in its spildarity. The employers and members of the Citisens' Allhance are being taught a great lesson and it is known that members of both of these organizations regret their open shop activity.

The Great Annual Socialist Press Picnic

All Socialists and friends of the cause of the working class will assemble in a mighty multitude at Riverview Park on Sunday, June 18. A splendid program has been arranged and all your desires, physical and mental, will be amply provided for.

The Socialist movement grows by publicity. Its press is its lifeblood. The existence of the Socialist press in this city depends largely on the success of this annual picnic. The failure of this picnic would be a terrible blow to our common cause. likelihood of this happening as every Socialist realizes its great importance and will be there.

Victor L. Berger, the first Socialist Congressman, will be the chief speaker of the day. Berger is destined to be a great political figure in this country's national politics, and this is the time for you to hear some of his plans.

The Protest

The plenic will protest against the illegal kidnaping of John J. McNamara. In view of this a special address will be delivered by Frank M. Ryan, international president of the Structural Iron Workers. This case promises to rival the Moyer-Haywood-Pettibone case, and you should be on hand to take your part.

Games and Races

While serious national questions will be well to the front, recreation and fun will be by no means forgotten. There will be concerts, races, ball games, refreshments and free dancing. Young or old, whether your mood be serious or festive, you will find plenty to

Admission Tickets

The Picnic Committee has completed a fine arrangement with the Riverview Park management, where there are ten coupons at-tached to the picnic ticket. Each of these coupons is good, along with part of the price, to one of the best amusements in the park. The saving to the ticket-holder, in one way and another, amounts to one dollar. And yet the whole ticket costs only 25 cents. Tickets may be obtained from County Secretary Larsen by visit or mail, Daily Socialist Building, 205 W st Washington street, or from Daily Socialist office or ward secretaries and by party members.

Daily Socialist Prizes

The Chicago Daily Socialist will give special prizes, as follows: For every dollar's worth of tickets you will be given a month's subscription to the Daily Socialist or a credit of 25 cents on the Daily Socialist book department. Thus you may help the cause and at the same time increase your own educational opportunities

Additional Prizes

Extra prizes will be given by the Picnic Committee to those selling the largest quantity of tickets. These will be very valuable and will be announced in this paper. Watch its columns from now on for picnic news and keep posted.

All Languages

This picnic is of international significance. It is for the benefit of Socialist papers in all languages. Here is the list: English, German, Jewish, Polish, Bohemian, Slavonic, Italian, Croatian, Scandinavian, Lettish, Russian, Slovak, Lithuanian, Finnisl

For a brief summer season, beginning Sunday evening, June 4, the Garrick theater will exhibit twice daily Lykman H. Howe's travel festival, which exploits the most modern examples of what a large class of play-goers have ome to know as moving pictures.

TO BE SEEN AT THE GARRICK

Lyman Howe was one of the pioneers in the business of moving pictures as public entertainment, and following the trend of public taste with a showman's acumen, and developing his entertainment with artistic taste and scientific conference with artistic taste and scientific application, the present exhibition is re-

The Howe exhibition is concerned more deeply with the educational phase,

although many of the popular subjects, such as farce and comedy, are not neglected on the programs, which are changed weekly.

The mechanical effects of the Howe pictures are said to be more highly de-veloped than the average film, and this feature is one of the potent factors in

the great popularity of the Howe

The Postoffice Pays

The chronic annual deficit in the postoffice department has given way to a surplus of a million dollars.

This gratifying result has been secured by the application of

efficiency methods and the profitable extension of postal service. Postmaster General Hitchcock is to be commended-at least for the result if not altogether for the methods by which it was obtained,

President Taft now intimates that he will recommend penny letter rates. He may think this good politics, but it is not.

Before letter postage is reduced let the wages of postal employes be increased and their hours of labor reduced. These men are overworked and underpaid.

Let Uncle Sam set a good example. Stop playing into the hands of big business interests and take care of the people who perform useful service.

Another suggestion: Stop paying the railroads exorbitant rates for carrying the mails. Why should the government pay more for a given amount of service than the express companies pay? Why should it pay more than private corporations pay? It is through the "undue influence" that the railroad companies bring to bear upon government officials that they are permitted to literally rob the people on mail contracts. Cut out this graft, and the postal department will show a large surplus every year.

The rates charged for transmitting money should be reduced by half by the postal authorities.

This would secure the department a large and very profitable business, besides giving the poorer classes cheaper service.

Of course, the bankers and the express companies object, and so far have prevented the government from giving the people decent service at cost on this line.

The postoffice is a great institution. In spite of the graft and favoritism due to the influence of capitalistic interests it gives the people better service and at a much lower price than any private corporation could or would give. It is one of the few Socialistic institutions in existence, and we are all proud of it.

Workingmen's Homes

The proposal to have the government issue \$500,000,000 in currency to be loaned to bona fide workmen in sums not to exceed \$2,500 for the purpose of building homes, the government to hold land and improvements for security, for repayment of loan in monthly payments in amounts equal to a moderate rent, is attracting considerable attention. A number of labor unions have indorsed the plan.

The idea is one of the "practical" schemes of the Socialists. It has already been incorporated into a law in South Australia.

Socialist Milwaukee has taken steps toward putting it into effect, and, if the capitalistic courts and laws do not stop the plan, that city will soon furnish workingmen with homes at cost and on easy payments.

Some of the capitalist papers are favoring the plan. They are beginning to realize that something must be done to stop the advance of Socialism, and hope to lull the workingmen to sleep by empty promises.

To make the plan effective, the currency issued for the purpose by the national government must be full legal tender. It must not be based upon interest-bearing bonds, but must go directly and without interest to the people.

The effect would be the lowering of interest rates and of house rents. It would stimulate building of homes and create a demand for labor, thus making the times better.

Were the matter to stop there the benefits would soon disappear. However, the working class, seeing that homes could be built collectively, would demand that factories and mills be operated for their benefit, and would thus lead toward a complete socialization of the production and distribution of wealth.

Oil and Tobacco Trusts

The Supreme Court gives the tobacco trust, as it did the Standard Oil, six months within which to reorganize its business in conformity with the law.

Practically this means a legal victory for the big interests. The Sherman anti-trust law is being construed in favor of "reasonable" inations. The courts are now engaged in formulating th rules which are to be observed by capitalists in forming trusts.

The class that now owns the great bulk of the wealth of the nation will continue to absorb, by rent, interest and profit, a large percentage of the wealth created by the laboring class. Their wealth will continually increase and will more and more completely dominate the economic and pol'ical affairs of the nation. Courts cannot stay the logic of events.

It requires a fundamental change in the OWNERSHIP OF CAPITAL—OF "THE MEANS OF PRODUCTION"—to do justice to the producer and to guarantee to the worker the full product of his labor.

Mr. Wickersham, attorney for the government, declares that the decision is a great victory for the government, while at the same time J. B. Mors, president of one of the principal tobacco companies, says: "Personally I don't think the decision will affect the business of any of the subsidiary companies. We will go right on

doing business."

Evidently the "government" and the tobacco and oil people understand each other quite well.

There are more men than there are jobs. In short, men are cheap, and the independent steel companies and other BUYERS OF LABOR propose to BUY IT AS CHEAPLY AS THEY CAN.

That is business. The "iron law of supply and demand" governs the labor market just as it governs the hog market.

That is what capitalists tell us; therefore it must be true. And what of the men who are out of work? What about their wives and babies? What shall they do? President Taft says: "God

gard governmental employes as more deserving of consideration than the employes of private companies, that we want all the workers to enjoy this and every other feature of our program, but that it is not immediately practical to enforce this measure in referrable

ers, for the practice that obtains in one industry frequently extends itself to other industries.

An effective argument for collective ownership is contained in this proposition, an argument, too, that will appeal mightily to the working class mind, because if the government controls the industries and if the workers control the government, then the workers industries and if the workers control
the government, then the workers
themselves will be able to determine
the conditions of their employment.
Hence the importance to them (1) of
setting up a working-class administration by rallying to the support of the
Socialist party and (2) of always voting for public ownership.

This may help us realize the figures
of \$3,994 killed and \$2,849 injured in extortionate rents for company houses.

The houses pay for themselves every

twenty-five years.

But the figures have grown so that the present rate is far higher than the average. In the Westmoreland county district alone 506 men were killed last year and 1,125 were injured.

The average annual wage in the Pennsylvania mines is \$546.

There are now 10,000 men on strike in the Westmoreland field.

logical Labor Organizations BY J. O. BENTALL

A circu ar letter signed by Stanley B. Wilson and J. E. Snyder, ors of 'me Citizen at Los Angeles, contains the following signifi-

Believing that the time is ripe, and rotten-ripe, for a change, believing that labor is awakening to the need of a labor press, we are sending you a copy of the Citizen, a sixteen-page paper, owned and controlled by the labor organizations of Los Angeles. * * *

The editorial policy of the Citizen is to fight the battles of labor.

We have come out squarely for Socialism and the Socialist party and shall make no compromise with capital-

This is startling.

It is also encouraging.

And it is logical.

Most labor organizations work for themselves in the industrial field and for the capitalists in the polling booth.

The leaders in the trade unions are almost a unit in supporting capitalism at the ballot box.

Therefore, no matter how strong these unions may be, they weaken themselves by electing capitalist judges, lawmakers and officials, who see to it that there are police enough to beat down the workers whenever they assert themselves in demanding their rights. Why labor unions should fight the capitalists in their own or-

ganizations but support them at the ballot box is a mystery that would deserve a black headline in one of the Hearst yellow rags. The labor organizations in Los Angeles are evidently ahead of

the Chicago workers. For here the unions have religiously followed the old capitalistspolitical parties that steal the last cent from their slaves in shop and

factory and pour these same slaves full of lead if they protest. Organized labor is a curse to the working class as long as it remains a subservient organized force for the capitalists in the

For thus, through organized effort of the workers, the capitalists are kept safe and the workers are kept down.

The logical union is the union that fights capitalism in both the industrial and political fields.

The Los Angeles labor organizations are logical and will win. Let Chicago's unions get in line.

Passing of National Prejudices BY AXEL GUSTAFSON

What is best suited for the age and time is adopted, regardless of its national source. And thus the national prejudices, which are owing to ignorance, pride, contempt and heredity, are gradually becoming conquered and disappear and instead mutual recognition, understanding and respect are being established and the causes of war dissipated and abolished.
