GIGANTIC GRAFT IN MISSISSIPPI FLOOD CONTROL

Current Events USSR

By T. J. O'FLAHERTY.

THE foreign editor of the Paris Matin has written for the New York Times a special article in which he declares his admiration for the United States tho there are a few trifling deficiencies that detract from the comfort of those accustomed to being waited on by less favored individuals engaged in the business of contributing to the physical and mental comfort of their betters. to a finer flower of civilization those little inconveniences will disappear. What we are chiefly concerned with is this editor's comment on our prosperity. A country that can give a Trade Delegation, embodied in the mason \$14 a day and a miner only a trade agreement with Great Britain, little less is a country worth fighting "has been violated by the British aufor. The fact is that many of them threw the agreement in their waste baskets and paid below the scale.

THAT a section of the American workingclass shares in the prosperity of American imperialism is undeniable. But this section is small compared to the total workingclass population of the country. The workers in a few favored trades-(favored for the time being. They will get their medicine later on) are petted because their employers find it pays better to be generous since they can afford it, than to risk greater losses thru protracted strikes. But it is becoming evident now that there will soon be a tightening up and that the bosses are getting ready to wreck the last bulwarks of A. F. of L. craft unionism in the United States. Then the budding "aristocrats of labor" may have to draw in the belt, unless the unorganized workers are organized and the present reactionary leadership of the trades union is supplanted by a progressive leadership.

How Patriots Get Cash To Be Told in DAILY **WORKER Series Monday**

How the National Security League, the American Defense Society, the National Civic Federation and a large number of lesser organizations finance their anti-labor activities is revealed in "Professional Patriots," which will appear serially in The DAILY WORKER beginning next Monday.

By far the most interesting facts deal with the manner in which the National Civic Federation, organized in 1900 to "reconcile capital and labor" took on its patriotic and suppressionary anti-radical activities immediately after the war.

"Professional Patriots" is edited by Norman Hapgood from material assembled by Sidney Howard and John Hearley.

The American Mining Congress session takes place in the midst of "noman's-land" in the coal lockout. The Ohio operators have been trying to follow the example of West Virginia and certain Pennsylvania companies and go non-union.

They have not as yet had much success-it is presumed by unionists here that the so-called mining congress will devote a good deal of its attention to inventing methods for stiffening the Ohio operators' resistance, if that be possible. At least the operators and their superintendents present in the Nanking Government, sent a will informally discuss the matter.

PREVIOUS EVENTS OF INSURANCE EXPOSE.

The DAILY WORKER herewith continues its expose of the fraudulent methods employed by the "Big Four," who are the Metropolitan, Prudential, John Hancock and the Colonial Life Insurance Companies.

In this series it is charged that these companies who monopolize the weekly payment life insurance business are guilty of fraud, misuse of "mutual" funds, manipulation of policyholders' money and subornation, to perjury.

On April 27th Governor Smith ordered Superintendent of Insurance James A. Beha to make inquiries into the charges contained in the Harrison articles.

So far the official apologist for the insurance companies has not submitted his report. The expose has caused something resembling panic in insurance circles. It affects upwards of 40,000,000 American policyholders.

Executive Chambers, Albany, N. Y.

It is now nearly three weeks since you have instructed Superintendent of Insurance James A. Beha to make inquiries into the charges embodied in The DAILY WORKER industrial insurance exposure.

During this time Daniel F. Gordon, Beha's assistant has written to the Worker pointing out that one of its charges are correct but was due to an "error" in printing. Mr. Beha himself has not deemed it worthy of his attenion to reply to the serious charges of fraud and misuse of "mutual" funds on the part of the socalled "Big Four".

What About Misrepresentation? As you are aware, among the many charges adduced in this series of articles, is one that the directorates of this enormous combine do not represent the interests of the 40 million policyholders who are members of the companies involved.

We refer specifically to the fact that Frederick H. Ecker, vice president of the Metropolitan Life Insurcause of his association with the the Chase National Bank in which over 20 million dollars of Metropolitan funds are always on deposit.

The Mississippi is an alluvial river. Its water carries billions of tons of sediment. It is a sluggish stream. It takes weeks for the rest of a flood to reach a given point. Foil the Bloodhounds of Capitalism

A ruling class in danger of extinction is compelled to employ its trained bloodhounds to ferret out and destroy the chief sources of discontent and rebellion against oppression. In some cases this service is done by police agents. In the case of The DAILY WORK-ER, the initiative has been taken by certainprofessional patriots.

The prize is a big one. The DAILY WORKER has already made itself felt as a sharp thorn in the side of the American capitalist class. Its frank exposures of the loathsome conditions under which capitalism exploits its slaves has won for The DAILY WORKER the undying hatred of the capitalist class and the ceaseless espionage of its ruthless bloodhounds. The DAILY WORKER has lifted the veil upon capitalist corruption. It is mobilizing the workers, it is helping to organize them, to abolish the nresent hateful system. If the capitalist class succeeds in destroying this powerful weapon of the working class, The DAILY WORKER, it will be a momentous victory for them and a costly defeat for the workers.

There is only one way to fight this attack. That is through the solidified support of the workers throughout the country. Wolves and similar beasts of prey are loath to attack

large groups. The bloodhounds of capitalism cringe in fear before the might of the masses. Now is the time to demonstrate our mass power in defense of our paper. Every contribution means another recruit to the great army defending The DAILY WORKER. You must join the ranks. You must do it now.

Palestine Workers Barred From Polls By Great Britain

JAFFA, Palestine, (By Mail)-For the first time since the British conquered Palestine in 1917-1918, Municipal Elections are to be held in that country. Hitherto municipalities in Palestine have been appointed and not elected, but in October the Government in Palestine did publish a Municipal Electoral Law. This law, however, is far from being democratic. No women have the vote which is reserved for males over the age of 25, who pay rates or taxes of not less than £1 a year. Candidates at Municipal Elections must be 30 years of age and pay rates or taxes to the value of not less than £2 a year.

The effect of these provisions in a poor country like Palestine is to restrict suffrage to the aristrocacy, big merchants and landlords, while the workers and laborers do not enjoy the right to vote, with the result that in towns like Acre, Tiberias and Nazareth only about 15 per cent of the population have the franchise, while in Jerusalem, Jaffa and Haiffa

the percentage is lower still. Requests which have been made to the Government of Palestine to place the franchise upon a broader basis have been refused. In Tel-Aviv the right has been secured for every inhabitant of the town who is 21 years of age and pays two shilling rates or taxes a year to vote at Municipal Elections. The working-class in other towns in Palestine demand that similar suffrage rights should be granted in all the towns of Palestine.

An appeal is accordingly addressed to the British working-class by more than 1,000 members of the Mamad Hapoalim (Workers' Class Club) for support in securing a wide democratic suffrage for the inhabitants of Palestine.

Over 100 Miners of Britain Still in Jail Under E.P.A.

LONDON, April 12. (By Mail) .-More than 100 British miners are still in jail charged with violations of the "Emergency Powers Act." This in spite of the fact that the miners' lockout ended in November and the E. P. A. was lifted in December.

The majority of the convictions, many of them resulting in severe sentences, were obtained on the favorite charge of "disturbance" and "riotous assembly." In a large number of cases the only evidence submitted in court was given by local policemen.

Women Jailed In South Wales 50 miners were sent

to jail by the Glamorgan Assizes. Among them were included five women. One of them, a mother of six children, all of them under eight years, was given a 3-months' sen-

The War on the Chinese Liberation Movement Continues!

The Hankow government, the genuine expression of the Chinese liberation movement, is growing stronger each day by rallying to its support the masses of workers and peasants and the honest elements of the middle class.

This is now definitely established in spite of the daily predictions of the fall of Hankow made by the imperialist press correspondents.

Chiang Kai-shek has not been able to organize a complete cabinet and with the exception of the son of Wu Ting-fang, who has no following outside of the wealthier Chinese and their hangers-on, he has no outstanding supporters.

Wu's appeals so far have been to the imperialists and not to the masses. Chiang, by his wholesale murders of workers in Shanghai and other industrial centers (it is estimated that more than 2000 trade unionists were slain in Shanghai alone) has alienated all support of the labor unions. The peasant organizations, against which he has adopted the same murderous methods in behalf of his landlord following, are also united behind the Hankow government.

It is of the greatest significance that one of the reasons for General Feng's recent victories in the northwest was the support given him by the Red Lances-revolutionary peasant organiza-

The imperialists are trying to hold the Hankow government in check while Chiang consolidates his forces. But there has crept into even the inspired British dispatches in the last week or so a despairing note. Chiang's negotiations with imperialism are known to all of China and the attempt to force upon the Chinese liberation movement a choice between compromise with imperial-heard of the slogans of the Chinese revolution. ism and closer relations with the labor unions and peasantry, has resulted in the isolation of the right wing from the masses.

Beginning with the intention of expelling and crushing the Communists and the left wing of the Kuomintang, Chiang has succeeded only in leading the capitalist and upper middle class elements out of the national liberation movement and leaving it in control of revolutionary leadership.

The policy of Chiang is a policy which the imperialists, with some reservations, can endorse. He and his followers ask for recognition of a nationalist government which will continue the horrible robbery of the Chinese masses with the Chinese capitalist and compradore class more firmly in the saddle.

It can be said that the traitorous desertion by Chiang Kaishek marks a new phase in the development of the Chinese revolution—the struggle which went on between classes in the Kuomintang came into the open and the enemies of the Chinese masses who were able to cover up their treason to some extent trust arrogance has outdone itself, in while inside the Kuomintang are now seen clearly as enemies of

The Responsibility for the Floods.

One disaster follows another as the Mississippi waters burst than 3 cents. The rates charged by electricity because they expect to get at new points their graft-constructed levees and sweep before the rushing torrents thousands upon thousands of unfortunate human beings. This sort of thing is totally uncalled for, and the blame rests entirely upon the shoulders of the United States government that has neglected in the most criminal manner the constructing of safe-guards for just such eventualities as the present holocaust.

Even in the face of wholesale devastation Calvin Coolidge refuses to call into session the seventieth congress so that adequate appropriations may be made in order to somewhat atone to the flood sufferers, who are the victims of an organized cynical policy of graft and pillaging of government funds extending over a long period of years. He knows that a special session would dramatically place before the world the black record of American statesmen who enriched themselves through false levee construction at the sacrifice of the lives and poor belongings of the dwellers in the Mississippi bottoms.

Boasting its superiority over other nations we now have a condition in the mid-southern section of the United States that has no parallel anywhere on earth.

For century after century the annual rise in the waters of the Yangtze river in China has been controlled by a system of spillways that divert the waters from the main channel and let them travel through other courses to the sea. The Egyptians in the great Nile valley inaugurated a similar system that is still in vogue to this very day. In other parts of the United States the spillway system is in operation. But the inauguration of such a system here would not furnish such splendid advantages for perpetual graft as does the idiotic and unscientific attempt to confine the Mississippi to one channel. Once established, the maintenance of such a spillway system would require but a fraction of the money spent yearly to maintain the treacherous levees.

The forlorn victims of recurring Mississippi floods, if aware of the real cause of their distress and of the criminals responsible for it would retire from office all those senators and representa-

tives from their states who share in the "pork-barrel" graft connected with appropriations for the system of "levees only." But the culprits are aided by the wide-spread prevalence in the South of the benighted doctrine of fundamentalism, which enables the ignorant preachers and priests solemnly to assure them that the recurring floods are a visitation from heaven in order to test their faith in the all-highest. The dirty sermonizing of the religionists supplements and justifies the plundering of the poli-

Again we must emphasize the fact that the official bureaucracy of the labor movement in this country shares in the responsibility for this state of affairs, by persistently, in their role of following the adjournment of the lieutenants of the capitalist class, sabotaging every attempt on the part of the workers and farmers to create a class party of labor that would make issues of just such situations and force the government to take steps to remedy the appalling and totally preventable suffering on the part of the impoverished cotton grow-Advertising rates on application ers of the lands bordering the river.

The Peasant Uprising in the Philippines.

The tremendous discontent among the Filipino peasantry, the result of continued exploitation, has expressed itself in a mass uprising for which the American imperialist press gives only a religious background.

It is well known to Marxists that agrarian revolts, both in Europe and colonial countries, and including even the earlier upsurges among the American farming population, have always had a strong religious tinge but that their causes can not be found in

There is a sad lack of data on the economic and social status of the millions of Filipino plantation workers and the sponsors of the movement for Filipino independence, almost exclusively middle class in origin and outlook, have contributed little to enlightenment on this important subject.

Demand Reinstatement of New York Locals

A set of eight demands has been formulated by a "Committee of One Hundred Fur Workers Forced to Register',, and these were included in an appeal made yesterday to all members of the furriers' union.

These workers who were forced to register, express a "vigorous protest against the fascist methods employed by the repudiated officials of the International Fur Workers' Union," and state that they are still loyal and devoted to the Joint Board.

The registered workers joint out the fact that the present International officials are actually "self-imposed dictators," because they were elected to serve only until May 1927; yet they have failed to call a convention and continue themselves in office without authorization.

Yet the A. F. of L. makes no protest about this illegal action, just as it made no protest against all the corruption of the Kaufman regime, says the statement of the registered workers. Criminal Syndicalism Law in California Upheld

CHARLOTTE ANITA WHITNEY

-Drawing by Lydia Gibson.

By LAURENCE TODD (Federated Press).

In two decisions the federal supreme court upheld, on May 16, both the political and the industrial ends of the California criminal syndicalism law. Miss Charlotte Anita Whitney, wealthy and educated woman from the East, who was convicted in Oakland on charges that she belonged to the Communist Labor Party which was born of the schism in the Socialist Party in 1919, lost her and unlawful methods to effect changes in industrial appeal. She is now liable to serve a sentence of from and political conditions," it declares; "there being nothone to 14 years in prison. William Burns, laborer, convicted of membership in the Industrial Workers of the World, and as an organizer in that militant body of laborers, was held to serve a similar term. Decisions Contradict.

A curious illustration of the quirks of the law is found in the fact that on this same day the same supreme court held that Harold B. Fiske, convicted of violation of the Kansas criminal syndicalism law, had not been class seamen. Just before the ship I have been twenty-two hours in the fairly convicted. The justices declared in their unanimous opinion that the I. W. Hence, the court decided The wages of a sailor are \$62.50 sick. I had a sore throat, cold and could not be convicted, on this evidence, of enlisting guarded against.

members in an organization proposing "crime, violence or other unlawful acts or methods as a means of effecting industrial or political changes or revolution."

Yet Burns, the court-with Justice Brandeis dissenting-held, was rightly convicted if he secured members for "an organization of persons organized and assembled to advocate, teach and abet criminal syndicalism, to wit, the Industrial Workers of the World." The court found that the I. W. W. "advocated, taught and aided various acts of sabotage that are plainly within the meaning of that word "as used in the California law. It recited some of these destructive acts, such as the driving of nails into growing trees to kill them, the placing of weed seeds in fields, and the scattering of combustibles to start fires in grain and to destroy farmers' property. Thus the I. W. W. was found guilty in the Burns case, under the California law, and Burns was held for prison because of his membership and activity in the I. W. W Urged Revolution.

Anita Whitney's conviction was defended by the majority opinion, read by Justice Sanford, on the ground that the California law had been directly violated by the national platform of the Communist Labor Party, and that the defendant failed immediately to leave the Oakland branch of the party when, against her urgent advice, it endorsed the national platform which called for re-

"There is no substantial basis for the contention that the legislature has arbitrarily or unreasonably limited its application to those advocating the use of violent ing indicating any ground to apprehend that those desiring to maintain existing industrial and political conditions did or would advocate such methods. Brandeis, Holmes Agree.

Justice Brandeis and Holmes, agreeing that Miss Whitney was rightly convicted, in view of her encouragement of the I. W. W. in California, through membership in the Communist Labor Party, disagreed with the majority opinion that the California law was justified in limiting freedom of speech and assembly.

"Fear of serious injury," they said, cannot alone justify suppression of free speech and assembly. Even imminent danger cannot justify resort to prohibitions of these functions essential to effective democracy, unless the evil apprehended is relatively serious." proposed proletarian revolution, they pointed out, must that the I. Everywhere this 1927 Easter-tide on Hamburg, is breathed the spirit of revolt; everywhere are to be seen the uniforms of the Young Front Fighters; and every other person is wearing the special Youth Day Badge or other Communist symbol. From Berlin arrives a contigent of over 2,000 Young Communists - how smartly they marched to the strains of the 'Red Army March"! Every few minutes, it seems, comes a group swinging along, banners waving, singing their songs of revolt lustily, menacingly, in challenging tone. And ever and anon comes the salute that is both challenge and greeting, with clenched fist raised shoulder high, "Rote Front"!

Comes the time for the Demonstration in the Hamburg Circus to commence. Inside are over 6,000 young workers, singing to the Music of the Red Front Bands. Outside are more than as many again. In front of the rostrum, perched high, bands are massed, ranged around in a great semi-circle are the 300 banners. Splendid! Magnificent!
