CHALLENGE FOR DEBATE.

Any time, any place, with any representative. I will affirm that the currency bill now before congress and endorsed by President Wilson and J. B. Bryan, violates every principle taught by the founders of the Democratic party on the monetary question and that Wm. J. Bryan has completely betrayed the trust of the people who have been advocating for the past 18 years on the financial question and that the Democratic party has been completely under the domination of the big capitalists than the Republican party was under Taft's administration.
